

J222448+010033  $z = 0.11$

10" (20 kpc)

A color astronomical image of a galaxy, identified as J222448+010033 at redshift z = 0.11. The galaxy appears as a bright, yellowish-white central core surrounded by a diffuse, orange-yellow glow. The background is dark with some green and red speckles. A white horizontal scale bar is located at the bottom left, with the text "10" (20 kpc)" to its right.
