

J163137+430624  $z = 0.14$

10" (25 kpc)

A color astronomical image of a galaxy cluster. The central region is a bright, dense yellow-white glow, fading into a diffuse orange and red halo. The background is a dark, noisy field of stars and distant galaxies. A white horizontal scale bar is located at the bottom left.

— Isophote at 3

A grayscale isophote map of the same galaxy cluster. The central region is a bright yellow-white glow, surrounded by a diffuse orange and red halo. The background is a dark, noisy field of stars and distant galaxies. A white horizontal scale bar is located at the bottom left.
