

J120134-010555  $z = 0.12$

10" (21 kpc)

A color astronomical image of a galaxy, identified as J120134-010555 at redshift  $z = 0.12$ . The galaxy appears as a bright, yellowish-white central region with a diffuse, orange-yellow glow extending outwards. The background is dark with some faint, noisy structures. A white horizontal scale bar is located in the bottom left corner, with the text "10" (21 kpc)" to its right.
